

NAVIGATING AUTISM ASSESSMENTS FOR FAMILIES AND CARERS

AN ALTERNATIVE PATHWAY TO AUTISM ASSESSMENTS

Seeking an autism assessment can feel overwhelming.

Long wait times, unclear processes and limited access often add stress to families who are already under pressure.

At Superyou Therapy, we have a goal: to make autism assessments more accessible for families.

That's why we've partnered with Smart Paeds, to develop an alternative pathway to receiving an autism assessment that is client-centred and collaborative at every stage.

We offer streamlined access to experienced professionals, and ongoing support, guidance and recommendations that help families beyond just the initial assessment.

HOW WE HELP

STREAMLINED ACCESS

Quick access to Superyou allied health & Smart Paeds paediatric professionals.

PROFESSIONAL COLLABORATION

Our integrated approach provides comprehensive, personalised support to families.

ONGOING SUPPORT

Ongoing support is provided. Clients receive guidance & recommended next steps.

Please note this pathway is one option for families to consider when seeking an autism assessment.

If you already receive support from a paediatrician, you can still access a standard autism assessment through Superyou Therapy.

And those who already have an autism diagnosis can work with Smart Paeds as a regular client.

01

REFERRAL

Submit a referral to Superyou. We explain the process and costs upfront, before we book you in for an assessment.

02

REPORT

Superyou completes the autism assessment and prepares a detailed report for the client.

03

COLLABORATE

Superyou then shares the report to the client and the Smart Paeds team.

YOUR AUTISM ASSESSMENT JOURNEY WHAT TO EXPECT

05

ONGOING SUPPORT

Smart Paeds and Superyou will then provide ongoing support to the client.

04

CONSULT

The client then attends a Smart Paeds consultation; where their team will review Superyou's report and provide necessary guidance and recommendations.
