

EDUCATION SUPPORT SERVICES AT SUPERYOU THERAPY

At Superyou, we believe every student deserves the opportunity to thrive in an inclusive & supportive learning environment. Our Education Support Services are designed to help schools create classrooms where **all learners can succeed.**

Through a collaborative approach, we work alongside educators, families & school leaders to provide practical strategies that **make a real difference** & reimagine what support looks like for schools and educators!

ACCESS & COMMUNICATION IN EDUCATION (ACE) PROGRAM

The Access & Communication in Education (ACE) program helps education teams better support students with complex communication & access needs. Integrating AAC & access technologies—like eye gaze & switch access—into classrooms helps students engage in learning & reach their full potential.

Key features of our ACE program include:

- Tailored capacity-building support that aligns with your school priorities
- Collaborative coaching & implementation support
- Enhancing educator capability in using AAC & access technologies

PROFESSIONAL LEARNING & EDUCATOR TRAINING

We deliver professional learning & educator training that builds staff confidence in inclusive, trauma-informed & neuroaffirming practices.

Topics include:

- Supporting speech, language & communication development in the classroom
- Understanding & responding to autistic & neurodivergent learners in affirming ways
- Enhancing literacy & early language foundations through evidence-based strategies

DEVELOPMENTAL STRENGTHS & NEEDS ASSESSMENTS

Our targeted screenings for speech, language, communication & sensory needs help schools identify students who may benefit from additional support.

These assessments are strengths-based & neuroaffirming, with:

- Individual screening assessment
- Bespoke screening report
- 2-hour information session for educators
- 15-minute parent consult
- At-home program
